Dear Mr. Stone,

I am extremely honored to be a recipient of the Class of 1953 Memorial Scholarship. I cannot describe enough how much a simple scholarship such as this means to me and how it has helped me here on my Journey at Princeton. I come from Marietta, Georgia, which is a suburban city about 30 minutes West of Atlanta. I have an older sister (21) and two younger brothers (13 and 16). My mom is an elementary school teacher and my dad currently owns a non-profit wrestling program that he uses to help low-income kids get involved in the sport of wrestling. My dad spends a large majority of his time helping nearby schools build wrestling in their communities. He also works with individuals including me and my siblings (Yes, all of my sibling wrestle including my sister) in improving our wrestling abilities as well as getting noticed by colleges to compete collegiately. My sister is currently on a female wrestling scholarship at Missouri Valley and I was recruited for wrestling here at Princeton.

With all that my parents do for the community, investing time and effort into helping others, money is tight. Thankfully a scholarship like this makes life a lot easier and has had a huge impact on my life here at Princeton. With all the time I spend on wrestling and academics, worrying about whether or not I have enough money to pay for food, clothing, a phone bill, and travel costs is extremely stressful. Thankfully this scholarship has relieved a large amount of that financial stress and allowed me to concentrate more effectively on academics and wrestling.

I am currently looking at becoming an engineer here at Princeton, although I am not quite sure which specific major I will choose. I have especially enjoyed my physics class in my first semester here and I am looking forward to taking Computer Science in this upcoming semester. I also participated in a summer program here at Princeton, called Freshman Scholars Institute (FSI). I made some great friends over the summer and we still hangout all the time. On top of those relationships, that I am sure will last forever, I also have a great bond with my wrestling teammates. Outside of the wrestling room, we spend a lot of time with each other and I am so glad and honored to be a part of such a great Princeton community. Once again, I am so very thankful to be a recipient of the Class of 1953 Memorial Scholarship. I cannot thank you enough.

With Appreciation,

Carlin Powell

Class of 2020

My name is Olivia Richardson and I am a prospective ecology and evolutionary biology concentrator and I hope to one day pursue a career in medicine. On campus, I am involved in the Big Sibs community service project through Community House. Last year, I was part of the William Trego Singers and though I am no longer part of this choir, I continue to take private voice lessons through the music department.

I also was a freshman orientation leader for the pre-orientation trip community action and I hope to do this again next year. I wanted to take this opportunity to thank the members of the class of 1953 who contributed to this scholarship fund for their generosity. Your help with my education is greatly appreciated.
